

Application Studio

Configure applications without the complexity of changing code.

We understand one size doesn't fit all. Epicor offers the flexibility you need to easily configure the system to meet your unique industry and business requirements.

A Revolutionary Approach to System Configuration

Application Studio takes a best practice approach to system configuration. It takes out the complexity of changing code, as configuration is done in a low/no code environment. Protect your investment by staying current with the latest releases as the configurations done with Application Studio are easier to upgrade, secure and cloud friendly. Application Studio tools offer an easier and faster way to create your own experience. Configure screens, fields, row rules, events, page layouts, and more.

Who is Application Studio for?

You don't need to be a developer to take advantage of Application Studio. These are common types of users and configuration scenarios.

Basic Users

They benefit from quick optimizations to their personal workflow, but don't spend time doing complex setup. These users are focused on personalizing their experience. Whether they want to tailor the screen for themselves, they configure grids, or define what columns they want to see in what order. They can also hide and show UI fields and set the defaults for collapsed or expanded panels.

Power Users

They may perform some system administration or support functions to assist other users. They often configure the system modifying screens, reports, dashboards and BAQs.

Developers

They are mainly focused on building and maintaining complex application configurations and integrations with other systems. They often write code.

Benefits

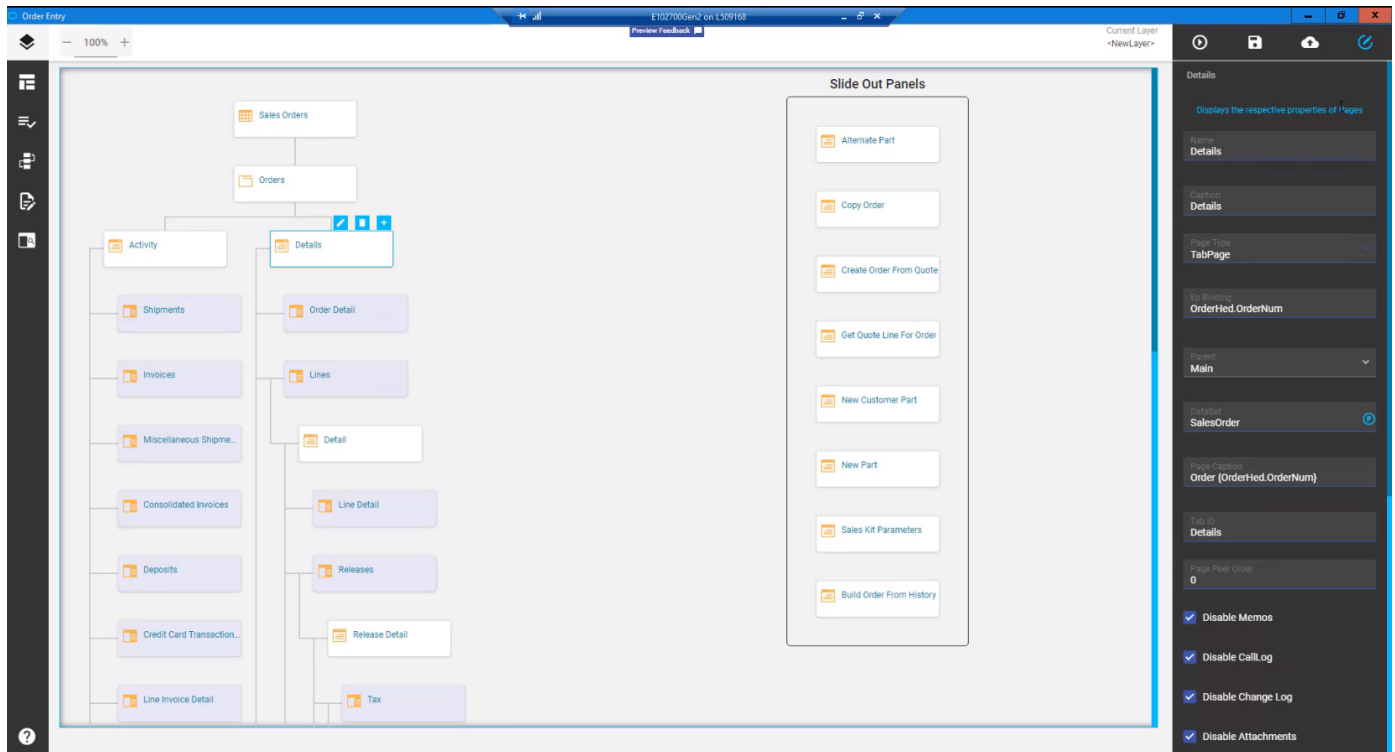

Create your own experience with Application Studio

Low/no code environment

Cloud friendly

Secure

Upgrade resilient

Personalization

Basic Users

- Change Grid Column order
- Hide and show Columns
- Hide and show UI Fields
- Hide and show Panels/Cards
- Collapse and expand Cards

Easy to Intermediate Application Studio Features

Power Users

- Promote and share Personalizations
- Re-arrange or remove UI Elements
- Add Custom UI Elements and Bindings
- Use User Defined Fields
- Display BAQ Data
- Add custom Pages and Dialogs

- Tailor Dashboards
- Tailor screens for phones and tablets
- Embed Data Discovery BI views
- Embed external Web Applications
- Add custom Grids and Filters
- Create complex workflows and automation
- Interact with Epicor Functions
- Run REST Services
- Extend or Add Data Views

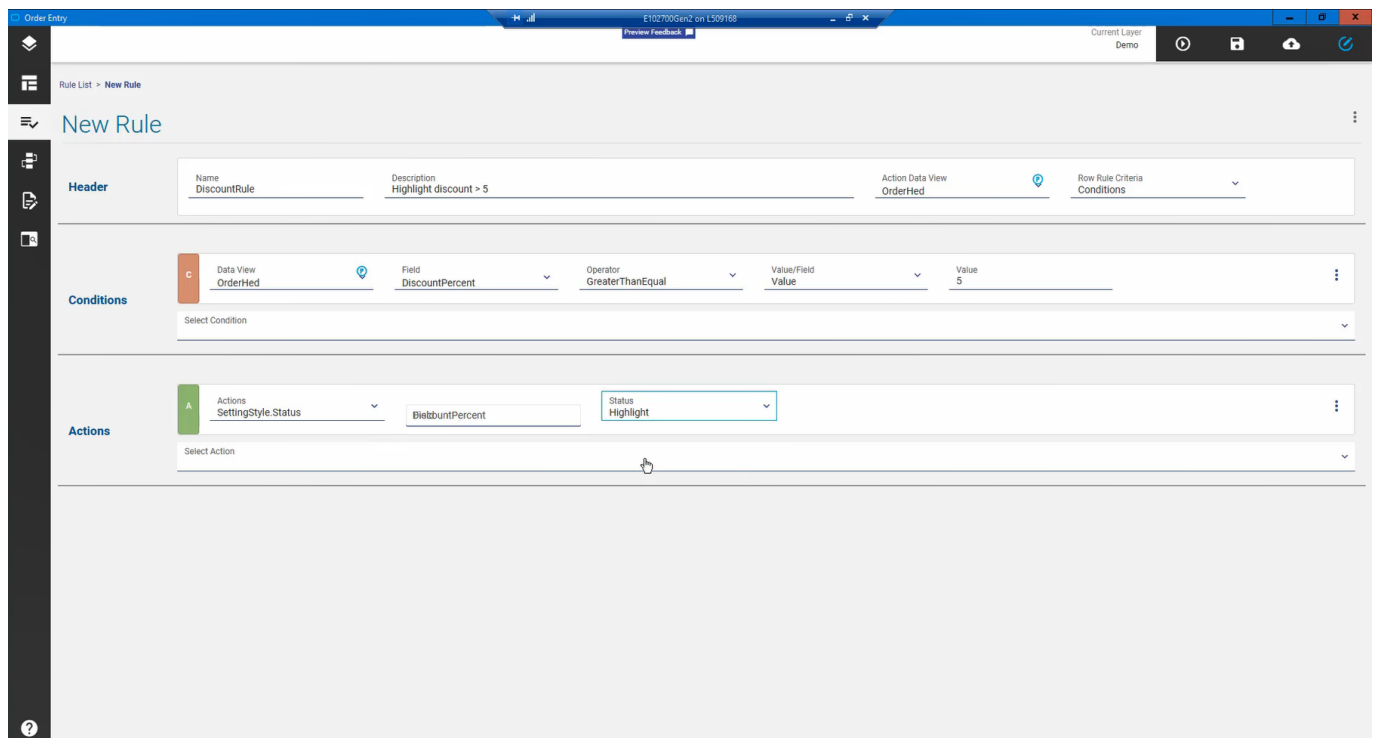

Developers

- Backend Data integrations
- Complex function authoring

Easy to Learn, Easy to Use

Application Studio has an easy to use interface that provides a modern user experience. Configurations are done through a visual designer and drag and drop functionality to add components— all done in a low/no code environment. Quickly access your existing configurations through a published menu, load into the editor, and preview your configurations before deploying them to other users to make sure you achieved the desired outcome.

You will have easy access to education and help resources from the application to get you started in no time. Also, Epicor Learning Center offers on-demand and hands-on virtual training around the different elements and use cases of Application Studio so you can become proficient with the tool.

EPICOR

We're here for the hard-working businesses that keep the world turning. They're the companies who make, deliver, and sell the things we all need. They trust Epicor to help them do business better. Their industries are our industries, and we understand them better than anyone. By working hand-in-hand with our customers, we get to know their business almost as well as they do. Our innovative solution sets are carefully curated to fit their needs, and built to respond flexibly to their fast-changing reality. We accelerate every customer's ambitions, whether to grow and transform, or simply become more productive and effective. That's what makes us the essential partners for the world's most essential businesses.
